WWW.BCSLS.NET & BCSLS@BCSLS.NET

We are very pleased to offer this correspondence course based on the very successful, live lecture.

GENETICS' GENIES

This course is directed towards Medical Laboratory Assistants:

1. To provide MLAs with the basics concepts used in diagnostic testing in genetics.
2. To provide an understanding of the different kinds of specimens required of diagnostic testing.
3. To discuss some of the important ways in which this technology can be used for diagnoses, intervention and preventative therapy.

Certificates of completion will be awarded to all registrants successfully completing the assignment. This course consists of 1 DVD (2 hours), a course manual and assignment. One set (DVD, manual and assignment) will be sent to you. The DVD must not be duplicated.

INSTRUCTIONS

1. Allow 2-4 weeks for delivery, within Canada, for your course. If you live outside of Canada then allow 3-6 weeks.
2. Upon receipt of the course material, verify that you have received:
 - a. Instructions
 - b. DVD
 - c. Corresponding lecture notes
 - d. Assignment
3. You have one month to review all of the course material:
 - a. After you have reviewed the course material, please complete the assignment
 - b. If you require assistance with the course material, please email your inquiry to the BCSLS office.
 - c. Our instructor will reply to your email
4. Mail the assignment to the BCSLS office.
 - a. Your marks and certificate will be mailed to you within 6 weeks of course completion.
